Workplace Violence Prevention Programs

PSHSA is proud to be offering the choice of two courses for our health care and community care clients in the Gentle Persuasive Approaches™ (GPA) to preventing workplace violence. Created by Advanced Gerontological Education, the GPA is grounded in the principle of person-centered care for dementia patients. Our clients may wish to attend one or both of our GPA courses.

Workplace Violence Prevention Programs: Preventing Client Aggression/Responsive Behaviours Through Gentle Persuasive Approaches™ - Program Development and Sustainability

This full day of training run by PSHSA supports direct care staff training requirements under the Long Term Care Home act including caring for persons with dementia. This program has been developed for the program lead and the multidisciplinary committee responsible for preventing client aggression. This session will assist in developing a sustainable GPA program framework that meets legislative requirements.

Enhancing your GPA Program – the Manager’s Perspective

This half day session run by Advanced Gerontological Education is aimed at managers from acute/long term/continuing care and community care who have already introduced GPA in their facility or who are contemplating implementing this approach. Managers, attend this session to increase your understanding of the challenges related to caring for dementia clients in your facility. Following this session, you will be better able to support front line care givers in utilizing the GPA program to its fullest.

If you would like to organize a GPA training session at your organization or town, please contact your PSHSA consultant.
If you're not sure who your consultant is you can find out here on the PSHSA website.
