

HealthForceOntario

The Co-Chairs of the Interprofessional Care Strategic Implementation Committee and *HealthForceOntario* are pleased to invite you to apply to the **Interprofessional Care/Education Fund** (ICEF) for the 2008-2009 year. The Fund provides funding support to innovative health education or health care projects that educate, foster and build interprofessional care teams throughout Ontario.

Funding decisions on specific projects for the ICEF will be guided by the policy document: ***“Interprofessional Care: A Blueprint for Action in Ontario” (the Blueprint)***.

Project proposals may be submitted to the ICEF by health employers, health regulatory colleges, health professional groups, or educators of health professionals. Project proposals must involve partnerships, and partners may include participants from among those groups, as well as family care givers and health volunteers. For a copy of the *Blueprint* and further information on the ICEF guidelines and the application please visit:

www.healthforceontario.ca

The application website will be open from September 9, 2008 to October 17, 2008.

We strongly encourage organizations to read the *Blueprint*, the Program Description document for 2008-09 and the Guide to Completing the Application Form before completing the application.

HealthForceOntario looks forward to fostering interprofessional care and education by partnering with organizations across the province.

Interprofessional care is a cornerstone of *HealthForceOntario*, the province’s health human resource strategy. This funding opportunity will help to integrate interprofessional care and education throughout the province. We encourage you to apply.

Sincerely,

Peeter Poldre MD
Co-Chair
Interprofessional Care Strategic
Implementation Committee
